1. Texts are not clear

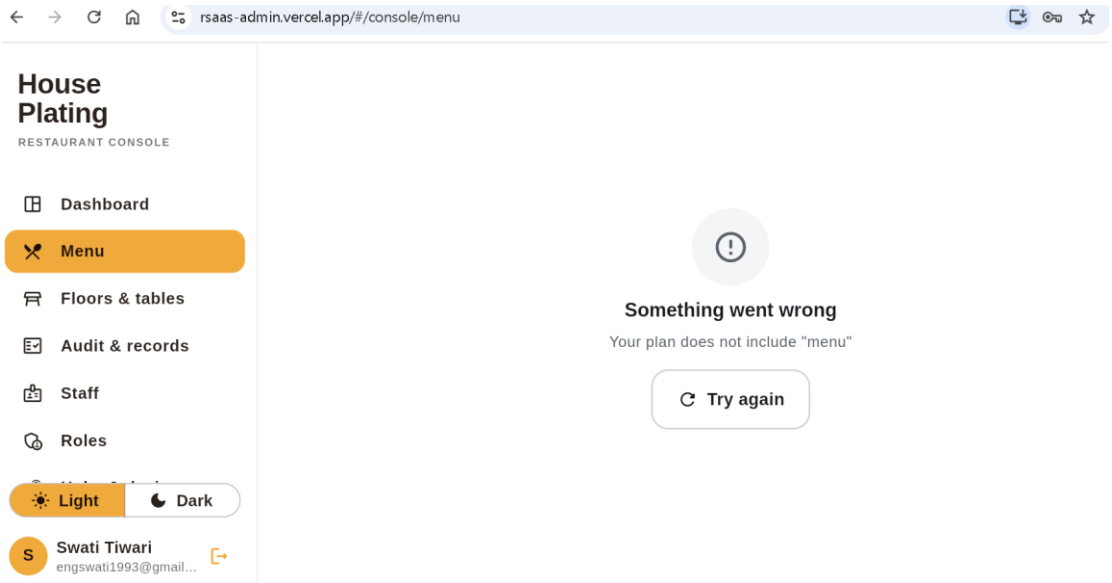

2. Text issue

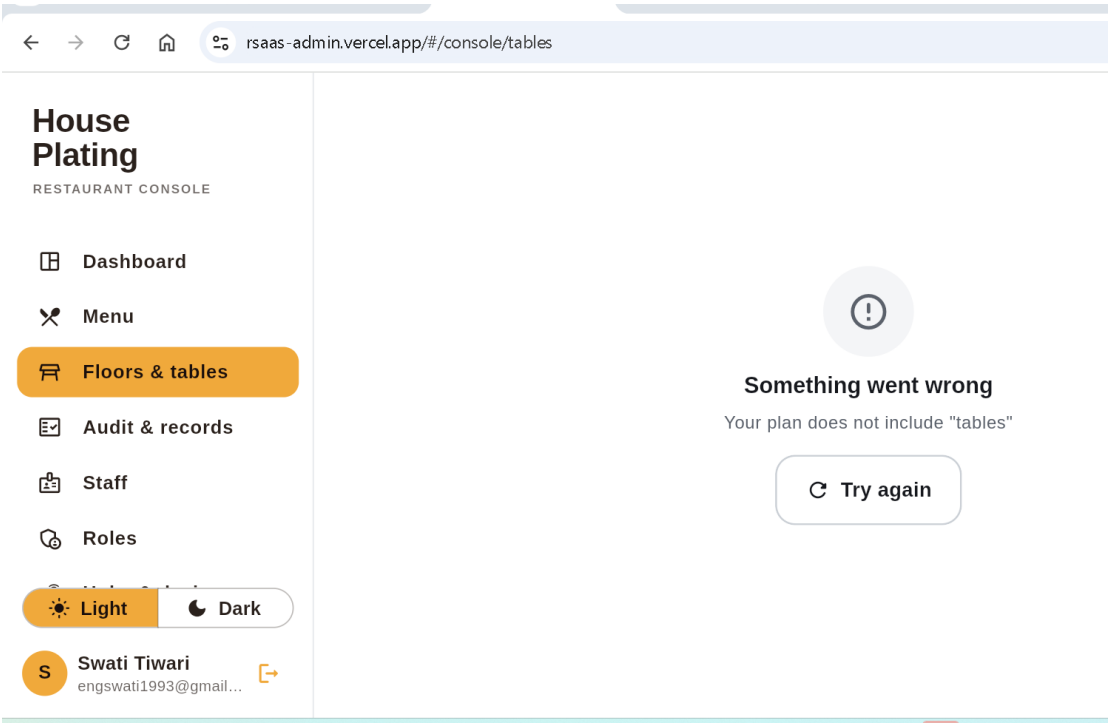

3. I revoked the plan but still it's active

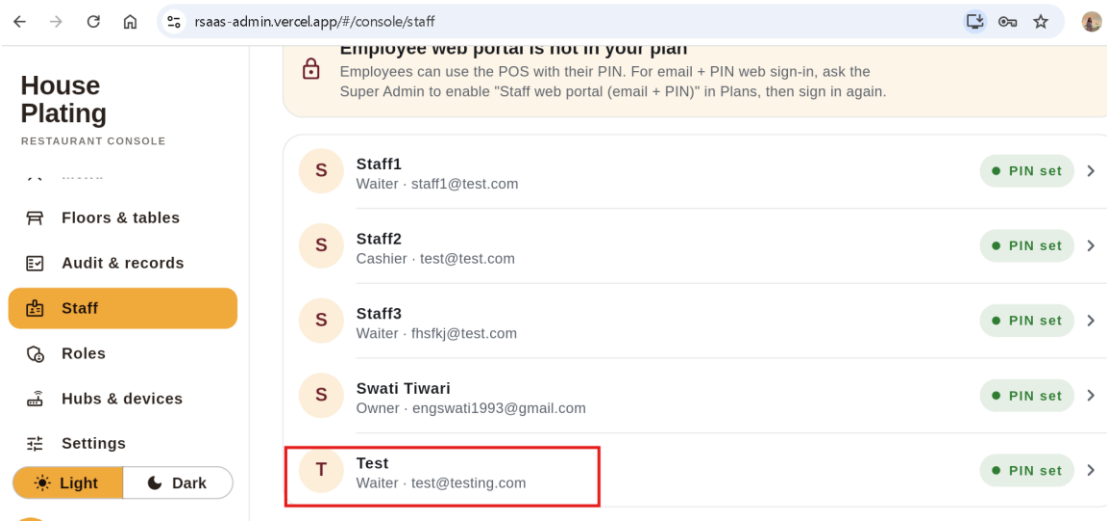

4. After revoking the plan, it shows ‘something went wrong on Menu’. it should show some proper msg

Same for floors and tables

5. Without any active plans, I am able to add the staffs

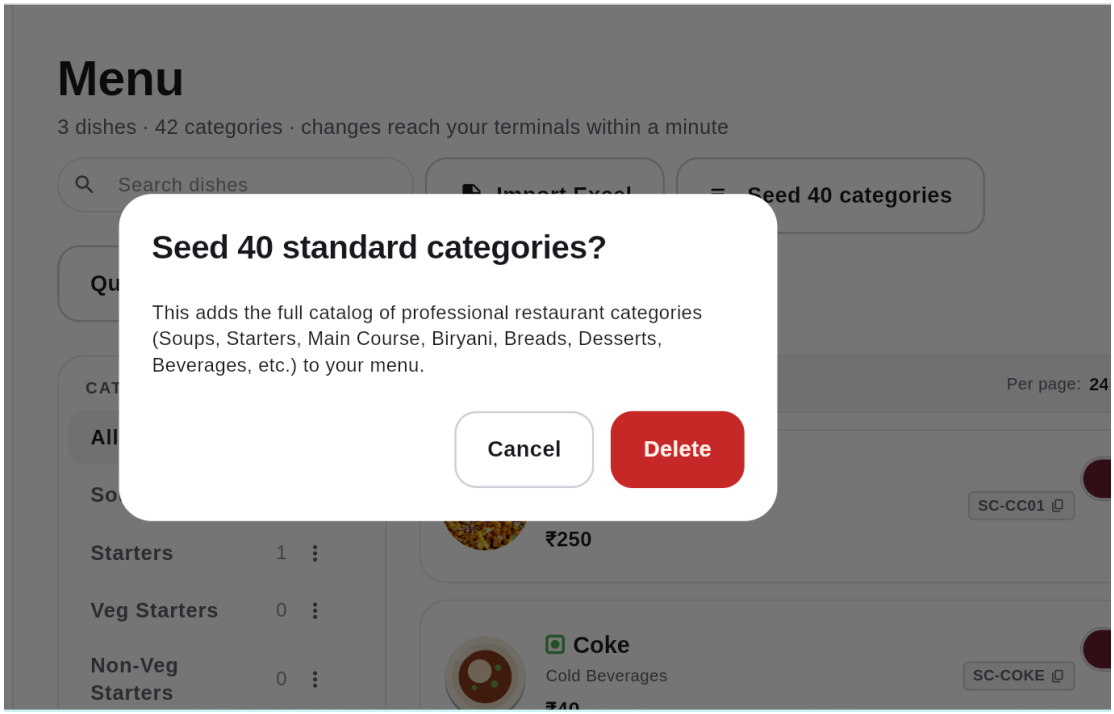

6. Template excel is not user friendly. Unable to understand what format data I need to give in excel. It has lot of technical information We can just give the column name and few sample data. And user can give their menu in other rows by following the sample data.

	A	B	C	D
6	sheet: recipes refer to product SKUs.			
7				
8	**Sheet "Items"**		**One row per dish or drink. item_code is the stable key: updates match on it, never on the name.**	
9	**Column**	**Required?**	**Meaning**	**Example**
10	item_code	Required	Stable code you choose (letters, digits, - _ .). Never reuse it for another dish.	BIRYANI
11	item_name	Required to create (blank keeps the value on update)	Name shown on the POS, kitchen tickets and bills.	Chicken Biryani
12	category	Required to create (blank keeps the value on update)	Menu category. A category that does not exist yet is created.	Main Course
13	description	Optional	Optional text. In update mode write CLEAR to remove it.	Dum-cooked, served with raita
14	active	Optional	TRUE to show on the POS, FALSE to hide. Blank = TRUE when creating.	TRUE
15				
16	**Sheet "Variants"**		**One row per size or portion of an item. Every item needs at least one. Each has its own selling price — a half plate is not assumed to cost**	
17	**Column**	**Required?**	**Meaning**	**Example**
18	item_code	Required	The item this size belongs to (from the Items sheet or already on your menu).	BIRYANI
19	variant_code	Required	Stable code / SKU of this size, unique in your restaurant.	BIRYANI-HALF
20	variant_name	Required to create (blank keeps the value on update)	What staff and guests see for this size.	Half plate
21	portion_label	Optional	quarter, half, full, or your own word. For information only.	half
22	serving_quantity	Optional	How much is served (a number), together with serving_unit. Example 500 + ml.	1

Instructions | Items | Variants | Recipes

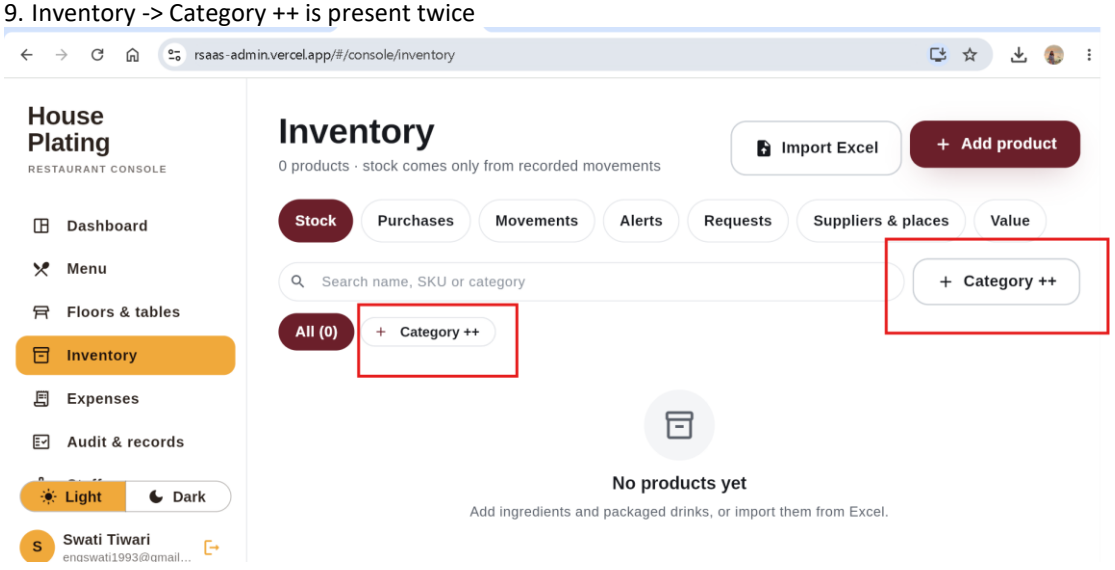

7. Clicked on Delete once. Something changed, but unable to add it again. Looks like Delete button is wrong name. Because description shows something else.

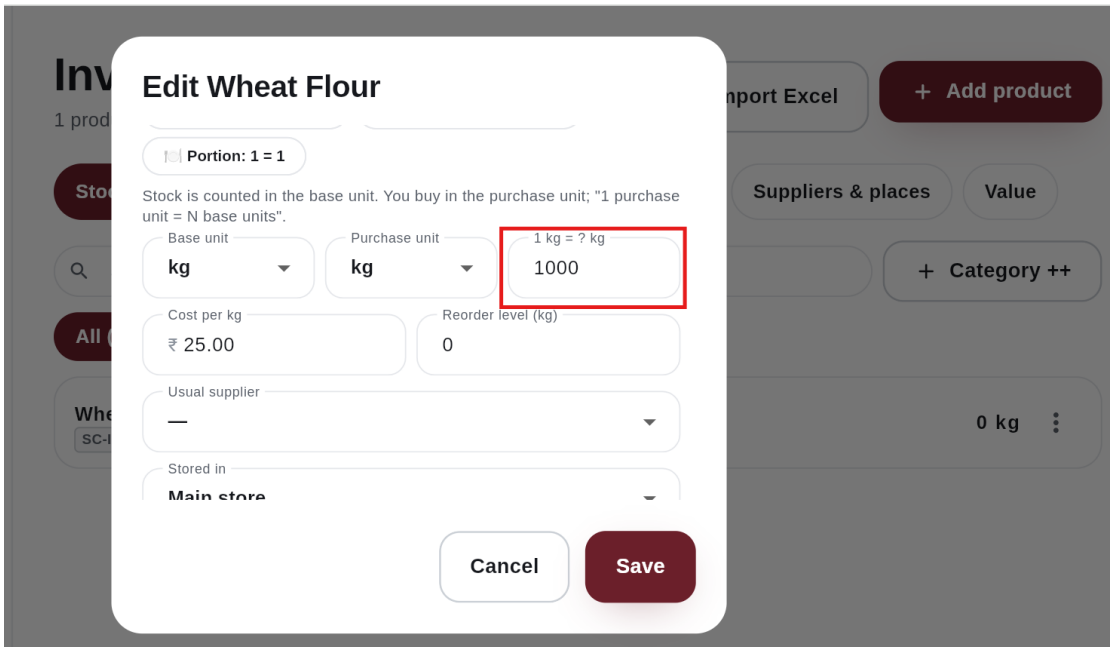

8. While adding a ‘Non veg main course’, toggle button is selected as Vegetarian. May be this can be enhanced. It can get selected by default based on what we choose. Suggestion

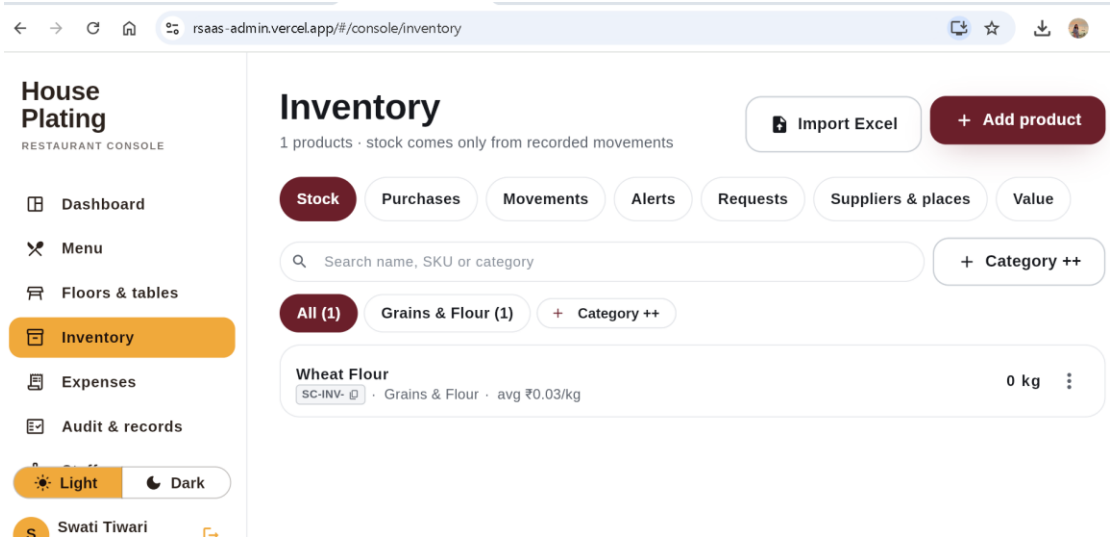

9. Inventory -> Category ++ is present twice

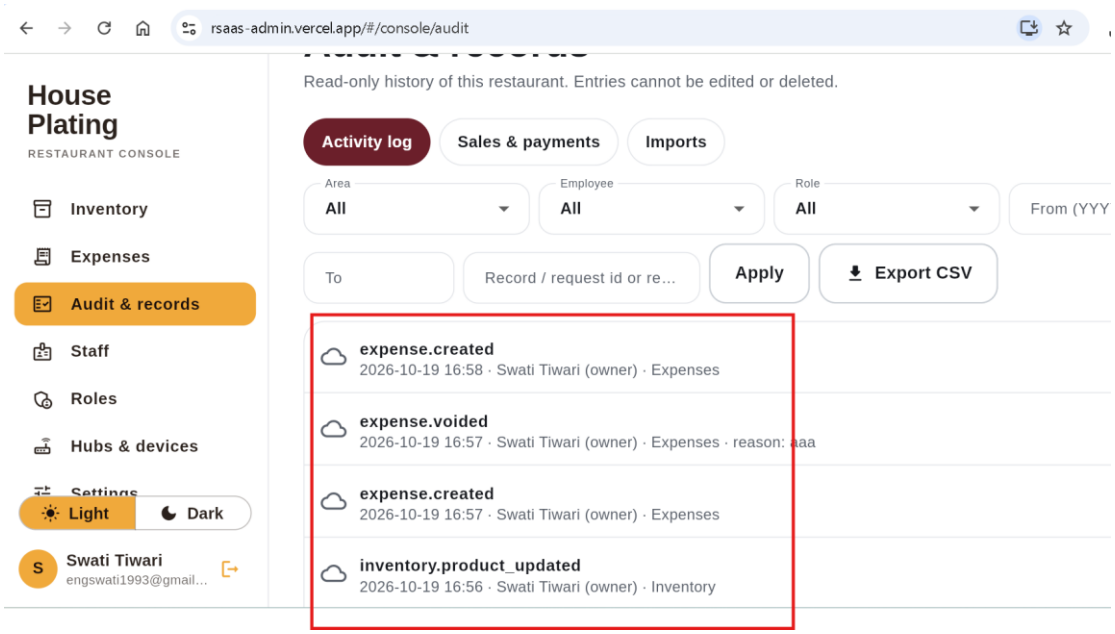

10. Kg = ? --> What is this? I added 1000 KG but after save it shows 0KG

11. Audit & records : Shows tables
